Objective

I seek to apply my creative problem solving talent, leadership abilities, programming skills, and professional dedication to a growing company. I enjoy working with new technologies, and I savor projects that positively influence the company's direction. I am ideally seeking a long term opportunity with room for future advancement.

Work Experience

Senior Vice President of Technology

9/2006 - Present Visient, Inc., Sarasota, FL

- **RESPONSIBILITIES:**
Duties include detailed project management, analysis and planning, specifications, development, testing, and support in a distributed team environment (local and long-distance workers).
- **PROJECTS:**
Projects have included regional portals, broker portals, and real estate agent websites along with content management (CMS), customer relationship management (CRM), automated valuation models (AVM), site skinning, and more.
- **TECHNOLOGIES:**
Technologies used heavily are ASP.NET, C#, Castle Framework, MonoRail, ActiveRecord, NHibernate, Visual Basic .NET (VB.NET), ColdFusion, and SQL Server 2000/2005.

Chief Technology Officer

6/2004 - 8/2006 Technology Wranglers, Inc., Sarasota, FL

- **RESPONSIBILITIES:**
Duties included detailed project management, analysis and planning, specifications, project estimates and quotation, development, testing, and support in a team environment.
- **PROJECTS:**
Projects have included consumer portals for real estate, mortgage and insurance industries, as well as a Virtual Office Website (VOW) solution entailing customer relationship management (CRM), task management, calendaring, document sharing, site skinning, content management, and more.
- **TECHNOLOGIES:**
Technologies used heavily are ASP.NET, C#, Visual Basic .NET (VB.NET), ColdFusion, and SQL Server 2000/2005. Regular work on database design and DTS Packages for data migration.

Senior Internet Developer

5/2001 - 6/2004 Prudential Preferred Realty, Pittsburgh, PA

- **NOTEWORTHY ACCOMPLISHMENTS:**
 - * Employee of the Month - November 2002.
 - * Intranet application increased Accounting productivity; reduced payroll processing by over 200 man hours per year.
 - * Automated website data processing, saving 130 man hours per year.
- **RESPONSIBILITIES:**
Duties included process analysis, planning, development, testing, and support in a small team environment.
- **PROJECTS:**
Projects have included a complete site redesign, Intranet applications for multiple departments, e-commerce and billing applications, customer relationship management software (CRM), user data collection and tracking, data maintenance

tools, and more.

- **TECHNOLOGIES:**

Technologies used heavily are Active Server Pages (ASP), ColdFusion, and SQL Server 2000. Regular work on database design and DTS Packages for data migration. Developed COM objects with Visual Basic (VB). Significant work with Verisign's Payflow Pro e-commerce API and SkipJack payment processing system.

Director of Software Development

10/2000 - 4/2001 HomeownersAssociation.org, Pittsburgh, PA

- **NOTEWORTHY ACCOMPLISHMENTS:**

- * Led site redesign, moving from static HTML to dynamic ASP.

- * Developed architecture that increased the development team's productivity by over 400%.

- **RESPONSIBILITIES:**

Duties included team coordination, project management, process analysis, plus developing and testing solutions.

- **PROJECTS:**

Site redesign, and migration to new technologies.

- **TECHNOLOGIES:**

Utilized ASP, SQL Server, JavaScript, ActiveX, stored procedures, and more.

Software Engineer

5/1999 - 10/2000 Armco Steel (AK Steel), Butler, PA

- **NOTEWORTHY ACCOMPLISHMENTS:**

- * Initially hired as an intern, and earned an "A" for my performance.

- * After completion of internship, was awarded a full-time position as senior level Visual Basic / ASP developer.

- **RESPONSIBILITIES:**

Duties included analysis, software development, and testing solutions in a small team environment.

- **PROJECTS:**

Quality control, handheld applications, client-server inventory systems, and various Intranet applications.

- **TECHNOLOGIES:**

Visual Basic, ASP, 4th Dimension (4D), VAX/VMS, Pascal.

Software Engineering Internship

5/1998 - 9/1998 General Electric (GE) Transportation Systems, Erie, PA

- **NOTEWORTHY ACCOMPLISHMENTS:**

- * Manager ranked overall performance as "outstanding."

- **RESPONSIBILITIES:**

Duties included analysis, software development, and testing solutions while working independently.

- **PROJECTS:**

Scheduling application, quality control.

- **TECHNOLOGIES:**

ASP, Microsoft Access, IIS.

Sole Proprietor

1/1997 - Present Sole Proprietorship, Sarasota, FL

- **SUMMARY:**

Since 1997, I have offered my services as a technology consultant. I have specialized in Internet consulting, but have handled other tasks such as hardware upgrades, tech support for various products, advice on purchases, and recommendations on other computer-related topics.

- **TECHNOLOGIES:**

ASP / ASP.Net, C#, ColdFusion MX, Visual Basic (VB), Microsoft SQL Server 2000/2005, Microsoft Access 97/2000/2003, JavaScript, Structured Query Language (SQL), Cascading Style Sheets (CSS), XML, Hand-coded HTML, COM / ActiveX, IIS for Windows NT/2000/2003.

Education

5/2000 [Grove City College](#), Grove City, PA

- Earned a Bachelors Degree in Computer Systems and Business Management.
- Worked 25-40 hrs per week while attending college, mostly within the computer/Internet field.

Technical Skills

- Microsoft .NET 1.1, 2.0
- ASP.NET (C#, VB.NET, WebForms)
- Castle Framework (Inversion of Control, ORM, MVC)
- MonoRail (MVC for .NET; similar to Ruby on Rails)
- Object Relational Mappers (ORM): ActiveRecord, NHibernate, NetTiers
- DBMS Management Tools (SQL Management Studio, SQL Profiler)
- ETL Tools (SQL Server Integration Services [SSIS], DTS)
- Coldfusion MX 6, 7, 8
- XML / Web Services
- AJAX (Microsoft Atlas/AJAX, Prototype library)
- Project Management Tools (TargetProcess, Bugzilla)
- Active Server Pages ("Classic ASP")
- Hypertext Markup Language (HTML)
- Javascript (JScript)
- Microsoft SQL Server 2000/2005
- Microsoft Access

Management Skills

- Extensive experience in coordination of large teams and complex projects (delegation, resource allocation, tracking, reporting)
- Strong interpersonal skills (good at creating a team environment)
- Excellent communication skills (both verbal and written)
- Able to translate requirements and issues between non-technical management and high-tech developers
- Aptitude for project planning and creating specifications
- Skilled at projecting time and cost estimations (budgeting)
